

EDUCATION

COLLEGE EDUCATION	Sri Eshwar College of Engineering	B.E CSE(CYS)	CGPA : 7.51 (upto 4th Semester)	2024-2028
SCHOOLING	Vel International Public School	HSC	75.0%	2022-2024
SSCHOOLING	Vel International Public School	SSLC	78.8%	2021-2022

Internships

Cybersecurity Intern – Infoziant (OPC) Private Limited

Worked as a cybersecurity intern where I developed a Capture The Flag (CTF) platform to simulate real-world security challenges and enhance practical learning. Gained hands-on experience across cloud and on-premise environments, focusing on building, securing systems. Contributed to solving cybersecurity problems through network monitoring and implementation of secure design practices in application and infrastructure domains.

Skills Acquired: Cloud Security, Network Monitoring, Secure System Design, Infrastructure Security, Network Security

PROJECTS

Carbon: AI-Native Multi-Cloud Behavioral Intelligence Platform [GITHUB LINK](#) 2026

Carbon is an AI-native multi-cloud security intelligence platform that centralizes AWS, Azure, and GCP monitoring into a unified dashboard. It combines Cloud Security Posture Management (CSPM), behavioral analytics, AI-powered investigations, session replay, real-time threat detection, and dynamic risk scoring to simplify cloud security operations and accelerate incident response.

Tech Stack: Python, Cloud APIs, Rule-Based Analysis, Logging & Monitoring Systems

DoS Detection – Network Security System [GITHUB LINK](#) 2025

DoS Detection is a network security system that identifies denial-of-service attacks by analyzing abnormal traffic spikes and connection patterns. It provides real-time threat detection, automated alert generation, and comprehensive logging for rapid mitigation. Built with Python, socket programming, traffic analysis, and logging frameworks, it strengthens network resilience against disruptive cyberattacks.

Tech Stack: Python, Socket Programming, Traffic Analysis, Logging Systems

NetDictator – Cybersecurity Monitoring & Control System [GITHUB LINK](#) 2025

NetDictator is an AI-powered Adaptive Data Protection Engine that enforces real-time data sovereignty across modern VPC environments. It combines context-aware security, dynamic ML-based sensitive data detection, identity and location-aware access control, encryption, masking, and tokenization to protect data while enabling secure, policy-driven access across cloud-native applications.

Tech Stack: Python, Flask, Network Monitoring, Rule-Based Detection, Encryption Techniques

ACHIEVEMENTS

Achieved first place in paper presentation at Hindustan college of engineering	2025
Third in intra college hackathon at Sri Eshwar college of engineering	2025
Third in Mini project expo at Sri Eshwar college of engineering	2025

CERTIFICATIONS

Network Defence Essentials(EC COUNCIL)	2026
Microsoft Azure (Udemy)	2026
Cloud Security Fundamentals (Palo Alto Networks)	2026
PythonProgrammingMasterclass (Udemy)	2025
Mastering Data Structures and Algorithm using C and C++ (Udemy)	2025
Cloud Fundamentals (AWS ACADEMY)	2025

CODING PROFILES

SkillRack: Solved 575+programs
Codechef: Solved 60+ programs
Leetcode: Solved 100 programs

TECHNICAL SKILLS

Cloud Platforms	AWS, Azure
DevOps & Containerization	Docker, Podman, CI/CD Concepts
Programming	Python, Java, C, C++
Tools & Platforms	Github, VS Code
Core Concepts	DSA, OS, CN
